What are the police doing about tool theft? What CAN the police do about tool theft?

ToolWatch App is the solution

Benefits for the Police

- A BSI Kitemark certified product.
- SBD accredited.
- **Free** lifetime service to the police forces. No fee for searching the **ToolWatch App** database to check the ownership of tools.
- Recovered tools returned to their owner through **ToolWatch** at the touch of a button.
- Time, money and man hours saving.
- Every 23 minutes a theft occurs. **ToolWatch App** allows the report to be filled in automatically with all the relevant details, serial numbers and photographs which saves on average 30 minutes per telephone call.
- 3 calls an hour on average – 72 calls in 24 hours.
- Average 30 minutes per report.
- Saving police 36 working hours per 24 hours period.
- Automatic email to the owner when the tool has been recovered by the officer. Officer has to do nothing else. This saves the officer on average 20 minutes on the telephone. Owner then organises to collect their tool.
- Saving officers 20 mins per tool find.
- **ToolWatch** generates a uniform crime number which can be used across all forces cutting down on unnecessary paperwork and assisting in fighting tool theft across county boundaries.
- Instantly discover authentic ownership of any tool registered on the **ToolWatch App**.
- Aiding stop and search facility for all officers. Enter a serial number, make of tool and the app will immediately report whether stolen and owners details and identity photograph.
- Eliminate the trade of stolen tools at car boot sales. Thieves can effectively be caught 'red handed' with stolen tools leading to criminal charges and successful prosecutions.
- Monthly and yearly statistic reports for each force on how many thefts reported, how many thefts were solved. Saves officers time in collating this information.
- Bridging the gap between the police force and the tradesman. This system will enable the police to return stolen tools to the rightful owner, freeing up police time, freeing up police compounds and more importantly, showing that the police are onboard with fighting this crime.
- **ToolWatch App** is a totally web based app accessed by the officer at this computer or mobile phone. No access to police servers needs to be granted.
- No huge IT roll-out needed to activate a force. 3 simple steps. **ToolWatch App** activates a force within its system which generates an email with a special link to ONE email admin contact within that force. The nominated admin clicks the link, thereby gaining access to **ToolWatch**. **ToolWatch** then activate that admin and the system is up and running.
- The nominated admin within each force can roll-out the **ToolWatch App** to designated officers by pressing one button on their **ToolWatch App** dashboard.
